Chernor Sulaiman Jalloh

Full Stack Software Developer • React • Node.js • Next.js • Automation

Freetown, Sierra Leone • Jallohincc@gmail.com • chernor.vercel.app

Age: 24 • Sierra Leonean

APPLYING FOR: Software Developer Intern — WAICA Reinsurance Corporation PLC

✓ Full Stack Developer ✓ Fintech Projects ✓ Available Immediately ✓ Freetown-Based

PROFESSIONAL PROFILE

A driven, self-taught Full Stack Developer with hands-on experience building secure, scalable web applications, fintech platforms and automated business systems. Proficient across the full development stack — React, Next.js, Node.js, REST APIs and database architecture. Passionate about building technology that solves real problems for African communities, with a demonstrated ability to deliver production-grade software independently and within professional teams.

TECHNICAL SKILLS

› React / Next.js	› Node.js / Express	› REST API Design
› JavaScript (ES6+)	› PostgreSQL / Supabase	› Git / GitHub
› n8n Workflow Automation	› WhatsApp Business API	› Secure Auth / RBAC
› UI/UX — Figma / Canva	› HTML5 / CSS3	› Vercel Deployment

KEY PROJECTS

Osusu — Fintech Savings Platform

Swift / Kotlin • Supabase • REST API

MOBILE • FINTECH

› Architected a mobile-first rotating savings and community finance platform for Sierra Leone's working population — complete with fraud prevention, KYC flows, tiered reputation scoring and a unified Kolo Wallet across three product modules.

› Designed full database schema, security architecture and phased rollout roadmap suited to a regulated financial environment.

SierraRide — NFC Transit Payment System

Offline-first • NFC • GPS • Node.js

TRANSPORT • FINTECH

› Designed a tap-to-pay transit system for Sierra Leone's informal minibus networks using Cardlan NFC hardware, with offline-first architecture and GPS-based stage detection.

› Engineered backend reconciliation and reporting layer to aggregate and process transaction data from hundreds of vehicles daily.

Scholr — School Management SaaS

Next.js • Supabase • Expo • PostgreSQL

SAAS • MULTI-TENANT

› Built a multi-tenant SaaS platform for private secondary schools across Sierra Leone, covering 30 modules including fee management, WAEC grading, BECE/WASSCE tracking and attendance.

› Designed scalable PostgreSQL schema supporting multiple tenants, role-based access control and real-time reporting dashboards.

SWIFT Dispatch Hub — Live Delivery Dashboard

React • Node.js • n8n • WhatsApp API

LOGISTICS • AUTOMATION

› Built a real-time React dashboard for live delivery tracking and dispatch operations, backed by Node.js REST APIs handling concurrent driver events.

› Integrated n8n automation with WhatsApp Business API for live order status notifications, significantly reducing manual support overhead.

PROFESSIONAL EXPERIENCE

Full Stack Developer

2025

Sendme SL — Logistics & E-Commerce, Freetown

CONTRACT • 2025

› Built and maintained the complete web platform for a logistics and e-commerce startup, developing both frontend (React) and backend (Node.js) systems.

› Designed and implemented REST APIs, database schemas and user authentication flows for a production environment.

› Architected scalable backend services to handle real-time order management and multi-user operations.

Frontend Developer Intern

2024

KNS — Knowledge Network Solutions, Freetown

INTERNSHIP • 2024

› Developed secure internal dashboards and data visualisation tools using React for a technology solutions firm.

› Implemented Role-Based Access Control (RBAC) interfaces and strict security protocols for internal tooling.

› Built real-time data monitoring components, translating raw data into actionable visual dashboards.

› Received a full-time employment offer upon completion — declined to continue university studies.

■ *Full-time offer received on merit; declined to prioritise academic and freelance commitments.*

Freelance Full Stack Developer & Automation Engineer

2024 – Present

Independent — Local & International Clients

FREELANCE • 2024 – PRESENT

› Delivered 5+ production web applications for diverse clients, managing full project lifecycle from architecture to deployment.

› Built n8n-powered automation systems and WhatsApp Business API integrations, eliminating repetitive manual processes for clients.

› Migrated legacy business systems to modern digital workflows, writing full technical documentation and deployment guides.

EDUCATION

BSc. Software Engineering with Multimedia

Limkokwing University of Creative Technology

Freetown, Sierra Leone • Expected Graduation: 2027

Relevant Coursework:

› Database Management & Systems Design
› Web Development & Software Engineering
› Multimedia Technology & UI/UX Design
